

Gorongosa Project: Senior Manager for Marine Science

The Gorongosa Project (<https://gorongosa.com>) is searching for a creative, energetic scientist to initiate and lead a program in marine conservation research and education, to be based in a soon-to-be-created marine protected area on the coast of Marrromeu National Reserve, Mozambique. The ideal candidate would have:

- -PhD in marine conservation or a related field
- -Experience designing and implementing research on marine conservation; expertise on mangrove ecosystems is especially advantageous
- -Established publication record in marine conservation science
- -Success in writing grants to fund research or conservation efforts
- -History of outreach work, connecting conservation to local communities
- -Experience teaching at the undergraduate or graduate level
- -Experience mentoring students in research
- -Experience leading multicultural teams in research and conservation
- -Ability to foster a collaborative, supportive work environment
- -Willingness to live in remote location with limited amenities
- -Ideally, able to communicate in English and Portuguese (preferred, but not strictly required)
- -Motivation to foster Mozambican students and support conservation through education
- -Organization, independence, and ability to lead multifaceted projects.

If interested, please send a CV and cover letter to Dr. Marc Stalmans (stalmans@gorongosa.net).
